Dear Guests, Colleagues, and Honored Participants

On behalf of the Health Department of the Akmola Region and the administration of Kokshetau Higher Medical College, we extend our heartfelt greetings to all professionals in the fields of medical education and oncology attending this important conference, dedicated to the 75th anniversary of our college and to pressing issues in oncology within the framework of the 13th Regional Meeting of the Asia-Pacific Organization for Cancer Prevention (APOCP).

This event holds special significance as it takes place during a milestone year for our college. We celebrate this anniversary with a profound sense of responsibility for the future. For the medical community of the Akmola Region, this international conference is of strategic importance. Today, Kokshetau is rapidly developing as a center for advanced oncological care, uniting specialized clinics, scientific research, and educational programs into a unified medical cluster. This integration not only allows us to implement modern diagnostic and treatment methods but also to train highly qualified professionals capable of responding to the challenges of oncology.

We sincerely thank all guests, speakers, and organizers for their participation in this meaningful event. Your knowledge, experience, and willingness to share innovative solutions make this conference a truly valuable platform for professional dialogue.

On behalf of the college leadership and staff, we wish all participants fruitful work, engaging scientific discussions, new discoveries, and effective collaborative projects. May this forum serve as a powerful impetus for the development of the regional oncology service and contribute to improving the quality of life for our patients.

Language	official languages of the conference – Kazakh, Russian, English

History of the Kokshetau Medical College

The history of Kokshetau Medical College began in 1949 as a nursing school, with the first graduating class consisting of 75 specialists.

Currently, the College provides training in 8 specialties and 9 qualifications in accordance with its license for educational activities. Since 2014, the college has also offered the specialty "Nursing" with the qualification of "Applied Bachelor in Nursing." Education is conducted in both Kazakh and Russian languages. In 2022, the college successfully passed the State Attestation by the authorized body of the Ministry of Health of the Republic of Kazakhstan.

The college is equipped with modern educational and material-technical facilities. Its structure includes 4 departments for the training of medical personnel, as well as a Center for Continuing Education, which provides retraining and advanced training for mid-level medical and pharmaceutical workers.

Over its 75 years of educational activity, the College has produced 87 graduating classes — a total of 24,890 nursing specialists. The College consistently maintains leading positions in the annual national ranking of medical colleges in the Republic of Kazakhstan (2015–2019). It also maintains well-established relationships and close cooperation with social partners.

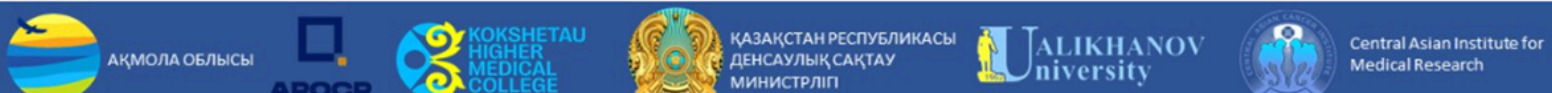

In order to improve the quality of training for mid-level medical and pharmaceutical specialists and to create the most favorable conditions for their education, Kokshetau Higher Medical College has signed Memorandums, Agreements, and bilateral and trilateral cooperation contracts with 38 medical organizations in the city of Kokshetau and the Ak-mola region.

International cooperation Memorandums have also been signed with the following institutions: State Budgetary Professional Educational Institution of the Republic of Sakha (Yakutia) – Yakutsk Medical College, Russian Federation; State Educational Institution – Republican Medical College of the Ministry of Health of the Republic of Tajikistan; State Budgetary Professional Educational Institution – Kurgan Basic Medical College, Russian Federation; I.K. Akhunbaev Kyrgyz State Medical Academy, Bishkek, Kyrgyz Republic; Educational Institution – Gomel State Medical College, Republic of Belarus.

Our graduates successfully work in leading medical institutions of the Republic of Kazakhstan, as well as in both near and far-abroad countries, which is evidence of the high quality of training provided by the college.

Kokshetau Higher Medical College implements a comprehensive model of a specialist, reflecting the necessary level of professional and personal qualities, knowledge, skills, and work ethics. This model ensures the development of personality and intellectual potential, fostering an individual approach to thinking and promoting lifelong self-development.
